## GrafX Website Studio

Advanced yet approachable appearance: The program offers an intuitive interface, some of its functions even featuring a wizard that enables even those with little prior experience to swiftly go through all the necessary steps to create their website, namely choosing a 'Template' and inputting basic details about it. After the initial configuration, GrafX Website Studio allows you to adjust the characteristics of the project by means of the 'Editing' component, as well as the multiple menus that let you work with the 'Content', 'Images', 'Tables', 'Stickers', 'Shop' and several others. Create, edit and customize websites and web pages. When starting a new project, you can input the 'Page Title', 'Company Name', 'Company Slogan' or 'Copyright'. At the same time, you can select the preferred 'Content Encoding Charset', the 'Filetype' (between ASP, HTM and ASPX) and the number of 'Total Pages'. Next, you can set the titles for the various tabs, with the option of editing the directories. The final step of the wizard lets you enter your keywords and the page description. These can later be modified, requiring only that you click on the 'Wizard' function in GrafX Website Studio's toolbar. The 'Editing' button enables you to input the text contents of the web page, while the upper menus allows you to customize the 'Navigation' preferences; from the 'Content' menu, you can change the text color, font name and size, line height, headline options, general background and more. Other adjustable features include the 'Themes', 'Images', 'Stickers', 'Tables', 'Shop' and 'Settings'. Once complete, the project can be exported to a folder or a CSS file, as well as uploaded, either the entire website or a selected page. A user-friendly webdesign tool for beginners and experienced alike. All in all, GrafX Website Studio is an efficient and reliable application which can help you create websites with little to no effort entailed, enabling you to perfect almost all aspects of the design without advanced
